Height: 4 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 5b

Group/Class: Hybrid Tea Rose

Description:

When you see this rose, you want it - the spicy fragrant flowers have bright cherry red flowers prominently streaked in white, simply calling out to be seen, a genuinely tough rose; all roses need full sun and well-drained soil

Ornamental Features

Scentimental Rose is draped in stunning fragrant fully double cherry red flowers with white stripes at the ends of the branches from early summer to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

Scentimental Rose is a multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Scentimental Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Scentimental Rose

Planting & Growing

Scentimental Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
